## **Vitreous China and Fine Fire Clay – Care**

Clean the outside surface of your toilet or lavatory with mild soap and warm water. Wipe the entire surface completely dry with a clean soft cloth. You may use soft abrasive cleaners when necessary to clean your vitreous china and fine fire clay product. Do not use strong abrasive cleaners, as they will scratch and dull the surface. Wipe any splashes of cleaning solutions from plastic or plated surfaces immediately. Use toilet bowl cleaners on the inside of the toilet bowl only.

If the surface becomes excessively dirty, use a general purpose cleaner such as Fantastick®, All Purpose Lysol®, Basin Tub and Tile Cleaner®, Soft Scrub® Multi Surface, Scrub Free® Disinfectant Bathroom Cleaner, Clorox Clean-Up®, Spic and Span Liquid, Comet® Liquid Bathroom Cleaner, Scrubbing Bubbles® Bathroom Cleaner, BarKeeper's Friend®, or Bon Ami.

Over time, hard water deposits may clog the toilet rim washing holes and trap ways. To clean, use a commercial cleaner that is recommended for removing hard water deposits. Be sure to follow the cleaner's manufacturer's instructions.

**WARNING** Risk of property or product damage. Do not use in-tank cleaners in your toilet. Products containing chlorine (calcium hypochlorite) can seriously damage tank fittings. The damage can cause leakage and severe property damage.
