Systèmes Hydroniques

Is a hydronic towel warmer right for me?

A hydronic towel warmer may be suited to your home if:

- You have a boiler system
- You are able to install the towel warmer(s) on a closed loop
- The loop incorporates an anti-rust inhibitor
- The loop operates at approximately 160°F/70°C (+/- 10%)

If all these conditions apply, then a hydronic Tuzio towel warmer will fit perfectly into your home!

Un chauffe-serviettes hydronique me convient-il?

Un chauffe-serviettes hydronique peut convenir à votre foyer si:

- Vous avez un système de chauffage à chaudière
- Vous êtes capable d'installer le chauffe-serviettes sur un circuit fermé
- Le circuit incorpore un inhibiteur de rouille
- Le circuit fonctionne à environ 160°F/70°C (+/- 10%)

Si toutes ces conditions s'appliquent, alors un chauffe-serviettes hydronique Tuzio s'adaptera parfaitement à votre foyer!

What will I need to install my hydronic towel warmer?

You'll need 3 pieces for successful installation:

- Hydronic towel warmer: all product codes begin with H for hydronic models
- A set of valves: either a floor set, or wall set depending on the location of your feed pipes
- An installation pack: the standard 24" installation pack can be cut to size and works with all ICO valves

Please note, if you've selected a Traditional Tuzio towel warmer (see pages 40-42), then you'll require a traditional gate valve.

De quoi aurai-je besoin pour installer mon chauffe-serviettes hydronique?

Vous aurez besoin de 3 pièces pour une installation réussie :

- Un chauffe-serviettes hydronique : tous les codes de produit commencent par H pour les modèles hydroniques
- Un jeu de robinets: soit un jeu pour plancher, soit un jeu pour mur selon l'emplacement de vos tuyaux d'alimentation
- Une trousse d'installation : la trousse d'installation standard de 24 po peut être coupée à la taille désirée et fonctionne avec toutes le robinets ICO

Veuillez noter que si vous avez sélectionné un chauffe-serviettes Tuzio traditionnel (voir pages 40 à 42), vous aurez besoin d'un robinet-vanne traditionnel.

FAQs

Can I cut CosyFloor cables or mats to size?

No. It is VITAL that you do not cut the yellow electric heating cable.

Please note that you will need less infloor heating than the total floor area to be tiled. If you have too much infloor heating cable or mat, you cannot cut off the excess product and discard – a correct size will have to be reordered.

We recommend keeping heating cables approximately 6" away from walls.

What is the recommended cable spacing?

We recommend 3-inch spacing between cables. Make sure the yellow cables never touch.

How can I avoid circuit faults?

Your CosyFloor kit is supplied with a circuit fault detector that you should attach during floor installation to check for faults. This does not replace the need for resistance tests - please ensure the resistance tests are carried out with a digital multi-meter as per our installation guide.

How long is the cold lead?

The cold lead at the end of the heatmat or heating cable is 10' long.

Can I lay my flooring straight on top of the cables?

No. Your infloor heating cables or mat must be completely covered in thinset prior to flooring installation.

Can I install CosyFloor under fixed objects?

No. Your CosyFloor cables should not be installed under any fixed objects. Keep yellow heating cable at least 6" away from toilet wax rings.

How do I activate the warranty?

Complete your warranty application form and return to the address provided – you will need a digital multi-meter to perform these tests.
